

HEP-008

Wet type Epoxy Putty

Product Overview

An epoxy sealer made of special polyamid that does not dissolve in water to repair cracks on under-water concrete structures.

Technical & Physical Data

Mixing Ratio (Part A : Part B)	1:1
Pot Time	20-30 minutes
Set-to Touch Time	24 hours
Viscosity (MPA-S)	Paste
Tensile strength	6.8 N/mm ² (KS F 4923:2005)
Adherence strength	18.4 N/mm ² (KS F 4923:2005)
Compression Strength	53 N/mm ² (KS M 3015:2003)
